

Don't forget that Woofers is also suitable for dogs doing activities such as agility, canicross and flyball or for the rural dog living life to the full!

Woofers is only available from your local Harbro Country Store along with other major dog food brands and a range of dog wormers, health care products, treats and accessories.

NEW IMPROVED FORMULATION

Why have we changed Woofers?

We listened to customer feedback and researched the latest nutritional advances in working dog nutrition and we felt it was time to give Woofers an update to ensure it was still meeting the daily requirements of the present-day working/active dog. We know how important it is to keep your working dog in peak condition.

We teamed up with one of the UK's leading dog nutritionists to develop a formulation that not only meets the increased energy requirements of the working dog but also provides additional nutritional support for optimum stamina and performance.

It look's different

A dog's food selection is based on smell, taste and texture, so we have used a rich in beef and salmon and wholegrain oats recipe with a crunchy texture, which will delight your dog. We have also introduced a 'Natural Formula' which is colour free, by doing this it has allowed us to add other ingredients that are more nutritionally beneficial.

IT'S IN THE BAG

So what's new?

Increased Quality Protein - vital to the working dog, it supports muscle development and recovery after a busy day.

Omega 3 Fatty Acids - the stress and strain of the working day can put extra pressure on your dog's joints and immune system, Omega 3 fatty acids help to combat this.

Functional Fibre - maintaining good digestive health is essential to ensure that your dog can utilise all nutrients provided.

Antioxidant Support - elevated Vitamin E helps to 'mop-up' free radicals and provide immune support.

Linseed, Biotin & Zinc - key nutrients that help to promote a healthy, glossy coat, so your dog looks as good as they feel!

Energy Availability - increased level from fat and protein to help promote performance, stamina and recovery rate.

We are sure your dog will love the difference - give it a try!

Feeding Woofers

Woofers can be fed moist by soaking with water/gravy but may be fed dry if this is more convenient.

Clean, fresh drinking water should be available at all times, even if fed moist.

Daily Feeding Guide

Woofers should be introduced gradually over a period of 5-7 days until it replaces the previous food completely.

Size of Dog	Food in grams/day
Small (5-10kg)	95-160g
Medium (10-25kg)	160-320g
Large (25-45kg)	320-500g
Over 45kg	500g

The amounts shown are only a guide and you should only feed your dog sufficient amounts to maintain condition dependent upon the level of activity enjoyed and conformation of your dog.
