

BEEFSTOCK NUTS

& Alkacid & Yea-sacc & Rumitech

OUR
BIGGEST
SELLER

**10% INCREASE
IN FCR. SAME DLWG
WITH LESS FEED**

RumiTech®

A high energy, palatable nut designed to support rumen development and optimise animal frame growth. Creep feed from 8 weeks of age to supplement milk and grass to ensure higher weaning weights and more even batches of calves.

Available in totes or bulk.

KEY FEATURES & BENEFITS

Rumitech	Increases feed efficiency which reduces feed intake by 10% yet at the same time promoting growth RECENT FIGURES FROM CALVES AT 6 MONTHS SHOW FEED CONVERSION OF 1:3
Alkacid	Our unique rumen buffer to provide 24hour protection against acidosis
Yea-Sacc	Market leading live yeast which enhances rumen function
Full mineral package	To support animal growth
Rumen friendly	Coarsely ground ingredients to reduce risk of acidosis
Sustainable beef	No palm kernel (in any Harbro feeds)

Top tips for calf creepers:

- One creep feeder per 20-30 calves
- Never let feeders get empty
- Keep troughs clean and free from debris

On farm success:

Ian & Angus Malcolm of Wester Coillechat and Cromlix Farms in Dunblane have used Beefstock pellets in their calf creepers for the last 2 summers. They couldn't believe how quickly the calves took to the feed when changing from a competitor with a noticeable difference in the bloom of the calves as well as a tighter gut. The calves also were significantly heavier at sale in 2019 compared to 2018.

Call your Harbro Cattle specialist or your local Harbro Country Store for feeding rates and advice.
